Customer No.: 22242

**PETITION UNDER 37 C.F.R. § 1.137(a) TO REVIVE
AN UNINTENTIONALLY ABANDONED APPLICATION**

Mail Stop PETITION
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Applicants hereby petition the Commissioner to revive the above-identified patent application ("the application"). The application was abandoned on January 17, 2007 for failure to respond to the Office Action dated January 18, 2006 (Exhibit A hereto). As explained in further detail below, Applicants respectfully submit that the entire delay in filing the required response from the due date to date of this petition was unavoidable and caused

by the Patent Office as described under MPEP 711.03 (c). A response (Amendment C) to the Office Action was filed contemporaneously with this petition.

More specifically, the original power of attorney for the application was to Customer Number 22242. On July 7, 2003, the assignee of the entire right, title and interest in and to the application, SmartSignal Corporation, revoked this original power of attorney and appointed: Perry J. Hoffman of Michael Best & Friedrich LLC, 401 N. Michigan Ave, Suite 1900, Chicago, Illinois 60611 as its counsel for the application. A copy of this revocation and appointment is attached hereto as Exhibit B. Then, on May 31, 2005, SmartSignal revoked this power of attorney to Mr. Hoffman and again appointed the practitioners associated with Customer Number 22242 as its counsel. Indeed, the undersigned signed and submitted the Statement Under 37 CFR 3.73(b) along with the revocation and appointment. A copy of this revocation and appointment is attached hereto as Exhibit C.

The practitioners associated with Customer Number 22242 did not receive a copy of the Office Action from the Patent Office. A copy of our docket record, where the non-received Office Action would have been entered had it been received and docketed, is attached hereto as Exhibit D. It appears that the attorney of record was not changed at the Patent Office. Indeed, the Office Action (Exhibit A) was addressed to Mr. Hoffman at Michael Best & Friedrich. We first learned of the Office Action on March 27, 2007 from a periodic review on public PAIR. For the foregoing reasons, Applicants respectfully submit

that the abandonment is the fault of the Patent Office and the delay for response to the outstanding office action was unavoidable.

In the event the Patent Office decides that the abandonment was not unavoidable, Applicants' hereby alternatively petition for revival on the basis that the abandonment was unintentional. Applicants hereby authorize the Commissioner to charge Deposit Account No. 06-1135 any amount necessary for the petition, including, if necessary, the amount of \$1,500 to revive for an unintentional abandonment. The Commissioner is hereby authorized to charge any additional fees which may be required in connection with this petition to Deposit Account No. 06-1135. Applicants also respectfully request waiver or a refund of any petition fee due to the abandonment not being the fault of the applicants.

Respectfully submitted,

Date: April 3, 2007 By: *Mark W. Hetzler*

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 - 21, 25 - 28, 31 - 37 and 50 - 51 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1 - 7, 13 - 21 and 25 is/are allowed.
- 6) ☒ Claim(s) 8 - 12, 26 - 28, 31 - 37 and 50 - 51 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 16 February 2001 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This Office Action is in response to an amendment filed on December 5, 2005. Claims 1, 8, 31 - 34 and 36 - 37 were amended. Claims 22 - 24, 29 - 30 and 38 - 49 were cancelled. No new claims were added. Claims 1 - 21, 25 - 28, 31 - 37 and 50 - 51 are pending. Claims 1 - 21, 25 - 28, 31 - 37 and 50 - 51 have been examined. Claims 1 - 7, 13 - 21 and 25 are allowable. Claims 8 - 12, 26 - 28, 31 - 37 and 50 - 51 are rejected.

Response to Arguments

2. As an initial matter, the Examiner would like to respectfully thank the Applicant for the well-prepared response, which was useful in the examination process.

3. Regarding claims 1, 8 and 13 rejected under 35 USC § 101:

a. Applicant's arguments have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

4. Regarding claims 1, 8, 13, 26 and 32 rejected under 35 USC § 103:

a. Applicant's arguments have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Drawings

5. The drawings are objected to because figure 7 contains entirely handwritten numbers. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the

replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

a. **Claims 8 - 12, 26 - 28, 31 - 37 and 50 - 51** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i. **Regarding claim 8**, the claim recites, "a training module disposed to distill characteristic operational data." It is unclear whether this phrase is an intended use or a claim limitation. The Examiner suggests the language, "a training module to distill characteristic operational data."

ii. **Regarding claim 8**, the claim recites, "and for training an empirical model of said empirical modeling module." It is unclear whether this phrase is an intended use or a claim limitation. The Examiner suggests

the language, "and to train an empirical model of said empirical modeling module."

iii. **Regarding claim 26**, the preamble of the claim recites, "A system for monitoring activity of another system." However, the end result of the claim appears to be a set of training vectors. It is unclear whether a step is missing from the claim.

iv. **Regarding claim 26**, the claim recites, "said selected vector being a system snapshot provided for initial inclusion in a training set." It is unclear whether this phrase is an intended use or a claim limitation. The Examiner suggests the language, "said selected vector being a system snapshot to initially include in a training set."

v. **Regarding claim 32**, the claim recites, "a process for selecting at least one vector from each of the equally spaced ranges for training the adaptive model." It is unclear whether this phrase is an intended use or a claim limitation. The Examiner suggests the language, "a process for selecting at least one vector from each of the equally spaced ranges to train the adaptive model."

Allowable Subject Matter

7. Claims 1 - 7, 13 - 21 and 25 are allowable.

8. Claims 8 - 12, 26 - 28, 31 - 37 and 50 - 51 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. The following is a statement of reasons for the indication of allowable subject matter:

a. **Regarding claims 1 - 7:** While Black, Freund, Klimasaukas and Passera teach a method of selecting input vectors for extraction of representative data for training of an adaptive model, none of these references taken either alone or in combination with the prior art of record teach the aforementioned method of selecting input vectors specifically including: ordering a set of training vectors according to a corresponding value in each vector of a particular sensor; dividing the set of training vectors according to equally spaced ranges according to the ordering;; and selecting at least one vector from each of the equally spaced ranges for training the adaptive model, in combination with the remaining elements and features of the claimed invention.

b. **Regarding claims 8 - 12:** While Black, Freund, Klimasaukas and Passera teach an adaptive apparatus for monitoring a system instrumented with sensors, none of these references taken either alone or in combination with the prior art of record teach the aforementioned adaptive apparatus for monitoring a system instrumented with sensors, specifically including: an empirical modeling module responsive to the data acquisition means for providing indications about the operational states of the system; a training module disposed to distill characteristic operational sensor data acquired from the system to a representative set of sensor data for storing in the data store and for training an empirical model of said empirical modeling module, by selecting from the characteristic operational sensor data time-correlated observations representative of regularly spaced intervals along an ordering of the observations according to

values in the observations of a particular sensor, in combination with the remaining elements and features of the claimed invention.

c. **Regarding claims 13 - 21 and 25:** While Black, Freund, Klimasaukas and Passera teach a method of selecting a set of training vectors representative of a system, none of these references taken either alone or in combination with the prior art of record teach the aforementioned method of selecting a set of training vectors representative of a system specifically including: selecting a system parameter of a system; ordering a plurality of system vectors according to said selected parameter; binning said plurality of vectors according to said ordering of said selected parameter; selecting a vector from each bin; and selected said vectors forming a training set, in combination with the remaining elements and features of the claimed invention.

d. **Regarding claims 26 - 28 and 31:** While Black, Freund, Klimasaukas and Passera teach a system for monitoring activity of another system, none of these references taken either alone or in combination with the prior art of record teach the aforementioned system for monitoring activity of another system, specifically including: a control unit controlling a monitored system; a data acquisition unit receiving information from said control unit and from said monitored system and providing system snapshots therefrom, system snapshots representing the state of said monitored system relative to the time the snapshot is taken; a memory storing said system snapshots; a sorter sorting collected system snapshots responsive to a selected system parameter; and a vector selector binning sorted snapshots and selecting a vector from each bin and, said selected

vector being a system snapshot provided for initial inclusion in a training set, in combination with the remaining elements and features of the claimed invention.

e. **Regarding claims 32 – 37 and 50 - 51:** While Black, Freund, Klimasaukas and Passera teach a computer program product for selecting input vectors for extraction of representative data for training of an adaptive model, none of these references taken either alone or in combination with the prior art of record teach the aforementioned computer program product for selecting input vectors for extraction of representative data for training of an adaptive model, specifically including: a process for receiving signals as input from a plurality of sensors as a set of training vectors; a process for ordering the set of training vectors according to a corresponding value in each vector of a particular sensor; a process for dividing the set of training vectors according to equally spaced ranges according to the ordering; and a process for selecting at least one vector from each of the equally spaced ranges for training the adaptive model, in combination with the remaining elements and features of the claimed invention.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Russell L. Guill whose telephone number is 571-272-7955. The examiner can normally be reached on Monday – Friday 10:00 AM – 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on 571-272-3749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Any

inquiry of a general nature or relating to the status of this application should be directed to the TC2100 Group Receptionist: 571-272-2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

ASSIGNMENT

We, STEPHAN W. WEGERICH, of Glendale Heights, County of DuPage and State of Illinois, ALAN D. WILKS, of Mount Prospect, County of Cook and State of Illinois, and ANDRE WOLOSEWICZ, of Woodridge, County of DuPage and State of Illinois, for good and valuable consideration, have assigned and do hereby assign to SMARTSIGNAL CORPORATION, a Delaware corporation, with its principal place of business at 4200 Commerce Court, Suite 102, Lisle, Illinois 60532, its successors, assigns and legal representatives, the entire right, title and interest in and to all subject matter invented by us and disclosed in the application for a United States Patent entitled

SYSTEM FOR EXTRACTION OF REPRESENTATIVE DATA
FOR TRAINING OF ADAPTIVE PROCESS MONITORING EQUIPMENT

U.S. Application Number 09/784, 158, filed February 16, 2001; and in and to all Patent and all Convention and Treaty rights of all kinds, in all countries throughout the world, for all such subject matter. We agree to sign all documents necessary to secure all said patents and rights, and request issuance of all said patents to the above assignee in accordance with this assignment.
